

FRAIS MONDE

ACQUA DI
REPOLE

Thermal sulphurous water:
Water that takes care of the skin

Protecting integrity of the skin
The well-being of the epidermis

ISMEG srl Località Passovecchio 88900 - Crotona
e-mail: assistenza.direzione@ismeg.it - Tel. 0962.930530 - Fax 0962.930247

**Scientific Mission of Repole water:
Water that fights time
strengthening the cellular
structure and improving the
aesthetic appearance
of the skin.**

**The Frais Monde product base:
the water that recognizes the skin**

**what for others is an excipient
for us is an active**

**Certified dermatological activity
by the Ministry of Health
D.D.6/6/2011 n° 4003**

**Irresistible well-being
value to your skin**

**The added value:
Smart element**

**Constant in its effectiveness.
Crystallized in its composition**

**Rich in sulfur, spa salts
and precious oligominerals for the skin**

The thermal water in powder

**Repole spa salts extracted from
our water:
The active energy.
The heart of the water.
The capital is very active.**

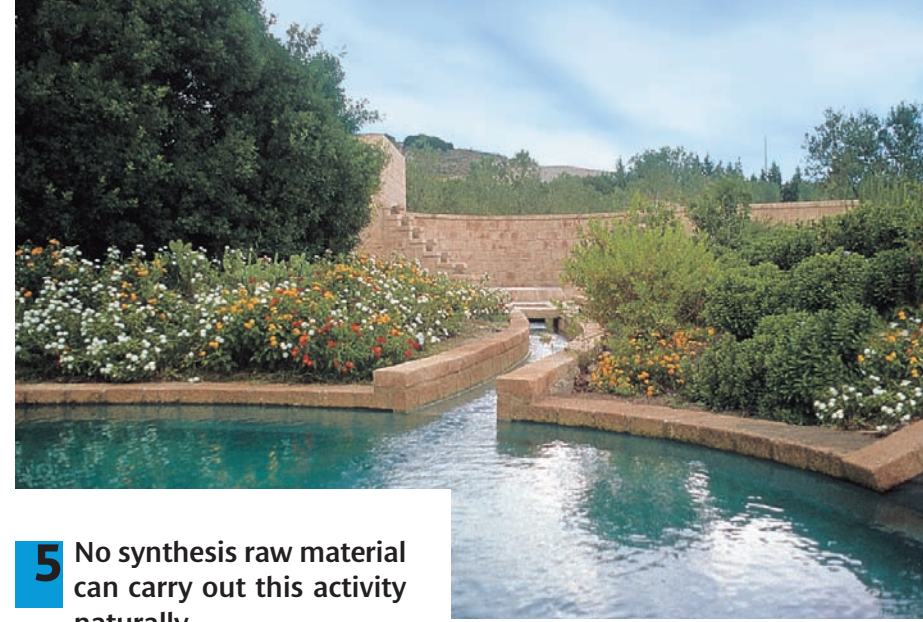

Why the skin treated with sulfur water of Repole is younger, healthier, smooth and fresh?

8 Plus that make it unique and inimitable

- 1** The secret of sulfur water is in the cytoskeleton of the epidermis cell that is made up of sulfur keratin filaments.
- 2** Sulphuric water provides sulfur, a raw material essential for the cytoskeleton and for the proper functioning and support of the cell itself.
- 3** The sulphuric acid strengthens the structure and strength of the cell. Provides protection and makes it work better (breathing and cellular vital activity).
- 4** Sulphuric water is the protection of the integrity of the skin.

- 5** No synthesis raw material can carry out this activity naturally.
- 6** The sulphurous water provides the cell with the raw material to make it in optimum condition and to perform all its functions.
- 7** Sulphurous water is the best way to get all of the active ingredients of the cosmetics formula to maximize their activity.
- 8** Sulfur water is the first brick for building skin beauty, such calcium for our skeleton and vitamins for the body.

SMART WATER: WHY THERMAL WATER CAN CALLED SMART WATER?

Because when it comes into contact with the skin it is able to recognize the conditions of the epidermis and to activate the mineral salts of the water that the water contains more suitable to the type of skin to be treated.

HOW CAN REPOLE WATER RECOGNIZE THE SKIN CONDITIONS AND WHAT IS THE ACTION MECHANISM?

Cheratin filaments (the protein that makes up the skin) are bound together by a bond consisting of two sulfur atoms. This bond is reversible, that is, it can break or be rebuilt. When the skin is too dry and squashed, there is a lack of these ties and the sulphurous water is able to reconstruct the ties and then recompile the skin.

Conversely, when the skin is greasy and impure there is an excess of these bonds, and in this case the sulfuric acid is able to break the bonds themselves by favoring exfoliation.

WHAT ARE ALL ACTIVITIES AND FUNCTIONS OF THE REPOLE WATER, WHY IT IS MULTIFUNCTIONAL?

The main activities are numerous:

- 1 Keratolytic action:** if the skin is too compact (fatty) it favors exfoliation.
- 2 Keratoplasty action:** if the skin is too dry and cracking it favors the compactness.
- 3 Sebo-fluidizing action:** normalizes the functionality of the sebaceous gland (impure skin).
- 4 Anti aging and stimulating regenerating action:** provides oxygen and nutrition to the cell.
- 5 Cicatrizing Action:** stimulates collagen biosynthesis.
- 6 Anti redness, decongestant, softening, protective for delicate, irritated, subtle and sensitive skin.**

WHERE REPOLE WATER IS GROWING? A UNIQUE ECOLOGICAL COMFORT IN EUROPE

Repole's water is a unique thermal spring that flows into the uncontaminated valley of the Neto River, with a history of over 2000 years (from antiquity recognized by the local population for dermatological properties).

It emerges purely from 200 meters deep through a sophisticated and eco-friendly capture system, is packaged at source to ensure biological purity and effectiveness (never in contact with air and light).

A few grams of thermal mineral salts are obtained from liters of thermal water, which become a unique and unrepeatable raw material in their composition.

SALTS

Composition of Thermal Salt and Their Activities:

- **Sulfates and sulphides:** purifying and normalizing.
- **Sodium:** nutritional, anti-emotional action (favors liquid reabsorption).
- **Potassium:** normalizing.
- **Magnesium:** protective and softening action.
- **Calcium:** protective tissues. It promotes cellular repairing processes.
- **Carbonates:** free and polishing anti-radicals.
- **Silicates:** regenerating tissue action.
- **Chloride:** detoxifying and disinfecting properties.

THE SCIENTIFIC RESEARCH TAPES STUDY AND CERTIFICATION:

**IDROLOGY INSTITUTE OF PAVIA UNIVERSITY (1982)
highlighted:**

- 1** Repole water has a sulfidrometer grade of 6,2 and is therefore indicated in dermatology and cosmetics.
- 2** It should not be diluted for cosmetic use.
- 3** It is precisely the dilution in nature of sulfur and mineral salts that determines the activity on the skin.

DERMATOLOGICAL CLINIC UNIVERSITY OF ROME TOR VERGATA

Certified after a long Repole water protocol and study that Repole's water has therapeutic properties in dermatological treatments (activity confirmed by the use of Repole's water on patients with dermatological problems and documented by the tests carried out).

MINISTRY OF HEALTH LEGISLATIVE DECREE OF 6 JUNE 2011 n° 4003

The Ministry of Health with Legislative Decree confirmed the **RECOGNITION OF THERAPEUTIC REPRODUCTIVE WATER PROPERTIES IN THE DERMATOLOGICAL DISEASE TREATMENT.**

WATER SPRAY WATER PACKAGED DIRECTLY TO SPRAY WITH EXCEPT EP SPRAY WITHOUT GAS.

THE SYSTEM PERMITS TO FILL IN SULFUR WATER AN ALUMINUM BAG IN THE BOMBOLE.

IN THIS WAY WATER PURCHASES WITHOUT CONTACT WITH THE CONTAINER WITH COMPRESSED AIR

MULTI-LAYER BAG GUARANTEES TOTAL PRODUCT SEPARATION ACTIVE FROM THE PROPELLER

Multi-layer bag containing the product

WITH THIS SYSTEM, WATER SAVES ALL THE EFFECTIVENESS OF NATURE THERMAL MINERAL SALTS AND ITS BIOADESIVITY DETERMINING DERMATOLOGICAL ACTIVITY.

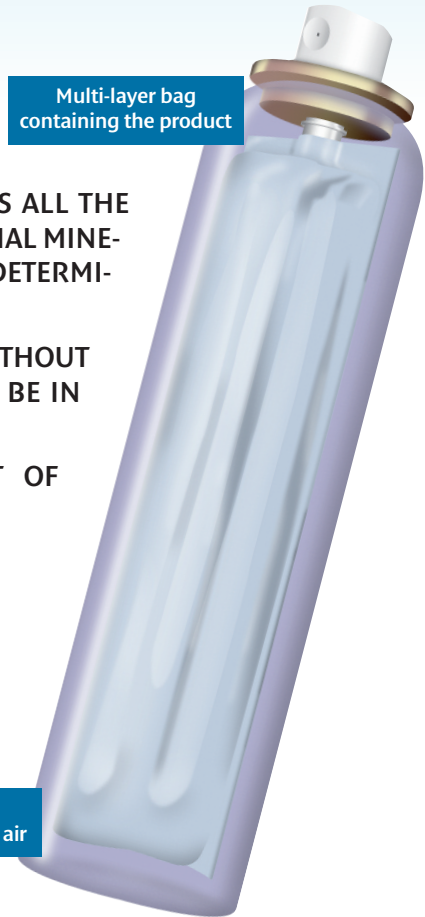

WATER COMES WITH LEATHER WITHOUT VISIBILITY OF THE LIGHT AND TO BE IN CONTACT WITH AIR.

AN IMMERSION IN THE SPIRIT OF SPRING.

AN IRREGULAR WELLNESS.

THE NATURE THAT CARE OF SKIN.

External bottle containing compressed air

For us it is Repole water, for you it is ..

"... it does not come to drops but like a cloud of water."

"..and first place in my ranking."

"... after trying it I will not buy anything else."

"this is the maximum."

"it's Italian, one more point."

"... my nighttime cuddle, my night-time relief."

***"Ideal for fixing the makeup
because he does not leave alone on his face"***

"..i find it fabulous!"

"... perfect for moisturizing body, face and hair during the summer"

"... indispensable, I always carry it with me."

"... necessary to attack on Monday."

"..fantastic!"

"... after the spraying my skin is fine."

"super-promoted!"

"... impossible not to love her."

"the best thermal water ever tested."

".."never more without "

"..top discovery!"

***"... after trying it I tell you the waters
thermal springs are not all the same."***
